THROUGH  
INNOVATION.

# BTI's ULTRA-LIGHT **NEVER-SEIZE** MANHOLE ASSEMBLY

## Contamination and Maintenance Issues are a Thing of the Past.

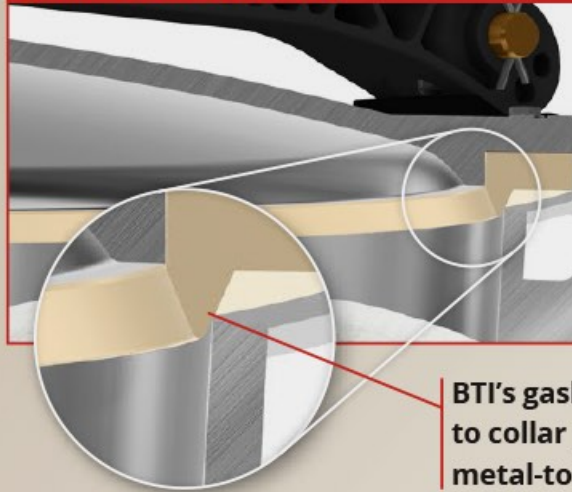

**100% totally American made.  
Every part. Every Step.**

Our new Ultra-Lightweight Food-Grade Never-Seize Manhole Assembly is innovating the industry.

### Features and Benefits:

- Up to 21 lbs lighter than industry standard assemblies.
- Self-aligning lid gasket and redesigned lid solve a leading issue with old-style assemblies that use the metal on the lid to align to the collar, allowing metal shavings to end up in your load from metal-to-metal contact when the lid is closed.
- Never-seize adjusters with sealed adjustment threads, protective o-rings, and a **10-year warranty**.
- Available with a composite, aluminum, or steel cam handle.

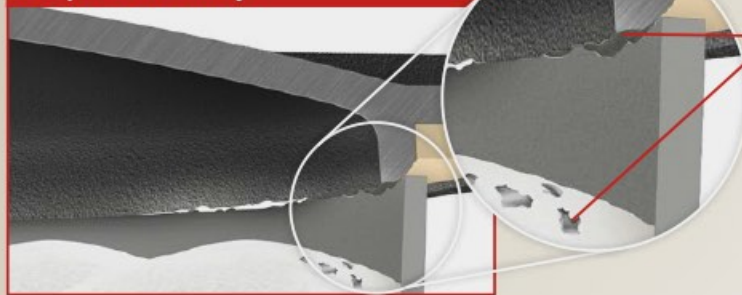

BTI's Never-Seize Assembly

BTI's gasket aligns lid to collar preventing metal-to-metal contact.

Competitor's Assembly

Competitor's lid with metal alignment lip causes chipping of collar and aligner allowing metal to end up in the load.

## BTI's Never-Seize Dry Bulk Manhole Adjusters

Guaranteed to keep your adjusters operating longer and working better.

- A** Sealed adjustment threads
- B** O-Ring Seal
- C** Built-in Scraper

Parts are interchangeable with leading manufacturers.

The final solution to costly maintenance associated with manhole assemblies. BTI's Ultra-Light Never-Seize Manhole Assembly is guaranteed to keep your manhole assembly operating for many years!

All BTI products are guaranteed to:

# LAST LONGER. WORK BETTER.
