

So Light and Strong you'll wonder where it came from.

B.T.I.
BlackMaxx™
Composite Fiber Butterfly Valves

The best just got better.

GUARANTEED STRENGTH. Composite Fiber is now used in the aerospace and auto industry for strength and weight reduction. We are so confident in the strength of our new BlackMaxx™ Composite Fiber bodied butterfly valve, we guarantee that the body, disc, stem and MaxxLife™ Seat* will out last and out perform any valve on the market today. No other butterfly valve manufacturer in the world can compete with it.

LIGHTWEIGHT. Combine our BlackMaxx™ Composite Fiber body with our AlloMaxx™ disc and you have the lightest butterfly valve ever made. Just 3.4 lbs on a 5 inch valve. Compare that to 7 to 8 lbs on the competition's valve- that's over 50% lighter.

A FOOD GRADE ALTERNATIVE TO STAINLESS STEEL. BlackMaxx™ is available with a Stainless Steel, Ductile, or AlloMaxx™ Ultra-Lightweight Disc. AlloMaxx™ by BTI is the perfect solution for food grade applications. It has all the durability and food safe properties of stainless steel at a fraction of the cost or weight.

ECONOMICAL. Now you don't have to choose foreign valves to hold cost down. BlackMaxx™ breaks the mold, it's quality at an inexpensive price, aka American Ingenuity!

Available in 2", 3" 4", 5", 6" and 8" sizes.

100% MADE IN AMERICA, WE PROMISE.

All BTI products are guaranteed to:
LAST LONGER. WORK BETTER.

*MaxxLife Seats are not suitable for fuel/petroleum service.
